PREFACE.

In compliance with the request of a deputation of Yacht Owners and others interested in Yachting, the Committee of Lloyd's Register of Shipping determined in 1877 to provide a Register for the faithful and accurate Registration of Yachts and to adopt Rules and Regulations for the Classification of this description of vessel.

The Register of Yachts, which is printed solely for the use of Subscribers, was first issued in 1878, and has since been published annually, except during the years 1916–17–18. A supplement containing additions and corrections is usually issued during the year.

The Register of Yachts contains the names, particulars and characters of Yachts classed by the Society, together with the particulars of other Yachts which are considered to be of interest to Subscribers, a List of Yachts of the International Rating Classes built since the 1st January, 1920, a List of Yacht and Sailing Club Officers and illustrations of their respective Flags, an illustrated List of the Flags of Yachts, a List of the Names and Addresses of Yacht Owners, and much other information of interest to Yachtsmen.

Of American and Canadian Yachts particulars of only the larger vessels are included in the Book, and a separate Register containing a complete List of Yachts of the United States, Canada, the West Indies, and South America is published from the Society's Office at 17, Battery Place, New York.

Information for the Register is obtained from the Society's Surveyors, the Registrar General of Shipping, Yacht Owners, Builders, Designers, and from various other sources. It would be appreciated if Yachtsmen, and others interested in the book, would assist the Committee in making it as complete and accurate as possible by giving early intimation of any changes of ownership, by forwarding any other information of interest to the compilers, and by replying promptly to any enquiry which may be addressed to them by the Society.

In this connexion it may be explained that although the book is published in May, it is necessary for the work to be placed in the Printers' hands early in March, the Register Section being passed for press alphabetically from that time onward until the beginning of April.

The Flag Section is re-drawn by the Lithographers every year, and this work is begun early in January and completed about the middle of March.

The Society undertakes, upon request of the responsible parties, the survey of Yachts during construction or of Yachts already built, with a view to Classification being assigned by the Committee of Lloyd's Register. Particulars can be obtained upon application to the Head Office, or to any of the Society's Surveyors.

71, Fenchurch Street, London, E.C.3. *May*, 1929.

PRÉFACE

Pour satisfaire à la demande d'une délégation de propriétaires de yachts, et d'autres personnes intéressées dans la navigation de plaisance, le Comité du Lloyd's Register of Shipping décida, en 1877, de publier un Registre pour l'enregistrement fidèle et exact des yachts, et d'adopter des Statuts et Règlements pour la Classification des navires de cette catégorie.

Le "Yacht Register," qui est publié uniquement pour l'usage des abonnés, a paru pour la première fois en 1878, et depuis lors, il a été publié annuellement, exception faite des années 1916-17-18. Un supplément donnant les additions et corrections apportées à l'ouvrage est ordinairement publié dans le courant de l'année.

Le "Yacht Register" contient les noms et les cotes, avec d'autres renseignements, des yachts cotés par la Société, ainsi que les noms des autres yachts, avec des renseignements qui sont considérés être de nature à intéresser les abonnés. Il contient, en outre, une liste des yachts de la Jauge Internationale, construits depuis le 1er Janvier, 1920 ; une liste des Officiers des yacht clubs et sociétés de régates, avec les dessins coloriés de leurs pavillons respectifs ; une liste illustrée des guidons particuliers des yachts ; une liste des propriétaires de yachts avec leurs adresses, et beaucoup d'autres renseignements utiles aux personnes intéressées dans la navigation de plaisance.

Pour ce qui concerne les yachts américains et canadiens; le "Yacht Register" ne donne des renseignements que sur les plus grands des yachts battant ces pavillons. Un Registre séparé est publié par les Bureaux de la Société, 17, Battery Place, New York, contenant une liste complète des yachts des États-Unis, du Canada, des Indes Occidentales et de l'Amérique du Sud.

Les renseignements qui figurent dans le "Yacht Register" proviennent des Inspecteurs de la Société, du Département de la Marine Britannique, des propriétaires de yachts, des constructeurs, des dessinateurs et d'autres sources diverses. Le Comité du Lloyd's Register serait très reconnaissant aux Yachtsmen et autres personnes intéressés dans l'ouvrage, s'ils voulaient l'assister à rendre le livre aussi complet et exact que possible, en signalant de bonne heure les changements qui se sont produits dans la propriété des yachts, ou tout autre renseignement de nature à intéresser les éditeurs, et en répondant promptement aux demandes de renseignements qui pourraient leur être addressées par la Société.

Par rapport à ceci, il y a lieu de remarquer que, quoique le Registre soit publié en Mai, il est nécessaire que l'ouvrage soit remis dans les mains des imprimeurs dans les premiers jours de Mars, la partie relative aux Yachts étant imprimeé alphabétiquement à partir de ce moment jusqu'au début d'Avril.

Les planches des pavillons sont reproduites chaque année par les lithographes. Ce travail est entrepris au début de Janvier et terminé vers le milieu de Mars.

La Société entreprend, à la demande de personnes responsables, la surveillance des yachts pendant leur construction, ou l'inspection des yachts déjà construits, en vue de l'obtention d'une cote, assignée par le Comité du Lloyd's Register. S'adresser, pour tout renseignement à ce sujet, au Siège de la Société à Londres ou aux Inspecteurs régionaux.

LLOYD'S REGISTER OF SHIPPING

AND THE

REGISTRO ITALIANO NAVALE ED AERONAUTICO.

NOTICE.

In pursuance of the wishes of the Italian Government, an amalgamation was effected between the two Italian Classification Institutions, previously known as the Registro Navale Italiano, with headquarters at Genoa, and the Veritas Adriatico, with headquarters at Trieste, in order to establish one Italian register of shipping, under the name of the Registro Italiano, now known as Registro Italiano Navale ed Aeronautico.

An Agreement, which came into operation on the 1st April, 1922, has been arrived at between the new Registro Italiano and Lloyd's Register, with the object of facilitating the classification of vessels with both Societies in the interests of shipowners, shipbuilders and underwriters.

Under the terms of this Agreement, Italian shipowners, while securing the national classification for their vessels, will, at the same time, be in a position to have Lloyd's Register class with as little inconvenience and expense as possible.

With this object, the Agreement provides that each Institution will give every facility for the assignment of its classification to vessels classed, or intended to be classed, by the other Society, provided the standard of strength and security is not inferior to that required by its own Rules, each Institution reserving to itself the right of confirming the class by means of surveys by its own Surveyors.

In order to obviate delays and inconvenience to shipowners and shipbuilders, the surveys of the two Societies will, as far as possible, be held simultaneously, and the Surveyors of both Registers are required to co-operate in entire harmony, and to hold jointly the surveys which they have to carry out.

KEY TO THE REGISTER.

KEY TO LLOYD'S REGISTER OF YACHTS.

SYMBOLS OF CLASSIFICATION, COLUMNS 10, 11 & 12.

(All Abbreviations employed in the Register are explained in the Alphabetical Key, page 81.)

100A Character of Yachts built of Steel or Iron in accordance with or equal to the Society's Rules and Tables.

90A Character of Yachts built of Steel or Iron in some respects deficient of the requirements of the Society's Rules for the 100A class.

A Without a numeral prefixed, character assigned to Iron and Steel Yachts already built to which the Society's Rules do not apply.

A Character of Wood or Composite built Yachts of the first class. The figures prefixed to the character thus, 18 A, 12 A, indicate the term of years for which the Vessel is at present classed. Figures placed within parentheses thus, (17)A, C(11), indicate the expired term of years — originally if on the first line, and on continuation or restoration if on lower lines.

A Without a term of years indicates that the Yacht, though not built according to the Society's Rules, is considered worthy of the class assigned.

Lv Lv
A1* A1 Characters assigned by the Underwriters' Register for Iron Vessels, now amalgamated with LLOYD'S REGISTER.

R Character of Yachts built in accordance with the Rules for Yachts of the International Rating Classes both as regards scantlings and equipment. The figures prefixed to the character thus, 16 R, 14 R, in the case of Wood and Composite Yachts, indicate the term of years for which the Yacht is at present classed.

1 The figure 1 after a character signifies that the Yacht is well and efficiently equipped (*see* Equipment Tables of the Society's Rules for Yachts).

A line thus — after the letter A, A or A signifies that the equipment is *not* in accordance with the Society's Rules.

In the case of Yachts classed R, the figure 1 for equipment is not employed, the equipment being required in these cases to be in accordance with the Rules for Yachts of the International Rating Classes before the class is assigned.

† Prefixed to the class of a Yacht indicates that she is also classed in the Register Book for Merchant Ships, and that the scantlings are equal to the requirements of the Society's Rules for the same.

The figures under a Character denote the date when the Yacht was last Surveyed by the Society's Surveyors.

When the port and date of Survey only appear, without the Yacht's Character, the Character has expired or been withdrawn because a Survey prescribed in the Society's Rules has not been held, or on account of non-payment of fees.

✠ This sign before a Character thus, ✠100A1, denotes that the Yacht has been built under Special Survey.

✠ This sign before a classification record of Machinery thus ✠LMC ✠NE&B indicates that the Engines and Boilers or both (according to the record which follows) have been built under Special Survey.

SYMBOLS OF CLASSIFICATION, COLUMNS 10, 11 & 12—*continued.*

3,27 A black line with date underneath indicates that the Yacht's Character was expunged from the Society's Register of Yachts at the date mentioned because, on account of reported defects, the Yacht was not entitled to a Character.

3,27 A red line with date underneath indicates that the Yacht's Character was expunged from the Society's Register of Yachts at the date mentioned because, on account of non-compliance with the Society's Rules as regards Surveys, the Yacht was not entitled to retain her Character therein.

... This sign indicates that the Yacht's class was withdrawn from the Society's Register of Yachts at Owner's request.

When the eleventh and twelfth Columns are left blank, the Yacht has never been Classed in the Society's Register of Yachts.

EXPLANATION OF RECORDS IN THE REGISTER OF YACHTS.

Tonnage (column 4). Thames Measurement Tonnage is an approximate representation of the internal capacity of a yacht derived from a system of measurement adopted by the Royal Thames Yacht Club in 1854. This tonnage appears in the Register in the case of every Yacht, and is printed below the official tonnages where these tonnages are given. The rule for computing the Thames Measurement tonnage is as follows:—From the length (measured from the fore side of stem to the after side of sternpost on deck) deduct the breadth, multiply this result by the breadth, and that product by the half breadth, and divide by ninety-four.

In the cases of Yachts which are officially registered, the official registered tonnage measured according to the law of the country to which the Yacht belongs is recorded in type like that shown at the side hereof. } 204·51 (Net) 546·65 (Gross)

For some foreign Yachts, the tonnage which is recorded has been measured in accordance with British rules and is accepted under British law. In such cases, the fact is indicated by the use of italic figures, thus:— } *204·51* (Net) *546·65* (Gross)

Dimensions (column 5). The dimensions which are printed on the top line are those employed for calculating Thames Measurement tonnage. In the case of yachts classed by Lloyd's Register, these are obtained from the Society's Surveyor's First Entry Report of Survey; where yachts are not classed by the Society, but are officially registered, the dimensions are obtained from the vessel's Certificate of Registry. In other cases the dimensions are as given on returns received from owners, builders, etc.

The **length** entered on the top line is the length measured from the fore side of stem to the after side of sternpost on the range of the upper deck, except in the case of unclassed yachts which are officially registered as British vessels, when the registered length is recorded.

The length entered on the second line is the length over all.

The length entered on the third line is the length on the water line.

The **breadth** recorded is the extreme breadth.

The **depth** is taken from the top of floors to top of upper deck beams amidships.

The **headroom** is the maximum clear space from top of floor or cabin deck to underside of beams at upper deck or coach roof *in way of Owner's accommodation* (*saloon*).

The **draft** is the maximum draft to bottom of keel.

EXPLANATION OF RECORDS IN THE REGISTER OF YACHTS—*continued.*

Date of Build (column 7). The date of build recorded in the Register for yachts built previous to 1903 under the special survey of the Society's Surveyors, is the date when the yacht was launched. For yachts built from 1903-1924 the last date of survey for first entry of classification is recorded when such survey was completed within six months of the date of launching, but when the first entry survey was not completed within that period, six months later than the date of launching is then recorded as the date of build. For yachts built subsequent to 1924 the date of completion of the special survey is taken as the date of build.

The date of build of engines and boilers is only recorded where the same differs from the date of build of the yacht, and, in these cases, the date appears in column 8.

Internal Combustion Engines (column 8)—

Alcohol Motor indicates an internal combustion engine using alcohol as fuel.

Gas Engine indicates an internal combustion engine using gas as fuel.

Oil Engine indicates an internal combustion engine using heavy oil such as Astatki, Mazut, etc., as fuel.

Paraffin Motor indicates an internal combustion engine using refined oil with a flash point higher than 73° F., such as Paraffin oil, Kerosene, Solar oil, etc., as fuel.

Petrol Motor indicates an internal combustion engine using highly volatile oils, such as Benzoline, Gasoline, Petrol, etc., as fuel.

Nominal Horse Power (column 8). The formulæ from which the Nominal Horse Powers of Steam Reciprocating Engines are calculated are :—

1. In cases of yachts in which the particulars of boiler pressures and surfaces are known :—

$$NHP=\frac{P+340}{1000}\left(\frac{D^2\sqrt{S}}{100}+\frac{H}{15}\right)$$ where the boiler pressure is below 160lb.

$$NHP=\frac{P+590}{1500}\left(\frac{D^2\sqrt{S}}{100}+\frac{H}{15}\right)$$ where the boiler pressure is 160lb or above.

For determining the Nominal Horse Power of Steam Turbine Engines $\frac{SHP}{6}$ is to be substituted in the above formulæ for $\frac{D^2\sqrt{S}}{100}$ where SHP. is the total Shaft Horse Power.

If the boilers are fitted with Forced Draught or Induced Draught appliances, then $\frac{H}{12}$ is taken instead of $\frac{H}{15}$.

2. In cases where particulars of the boiler pressures and heating surfaces are not known :—

$$NHP=\frac{D^2\sqrt{S}}{100}$$ for Triple and Quadruple Expansion Engines.

$$NHP=\frac{D^2\sqrt{S}}{120}$$ for Compound Engines.

$$NHP=\frac{D^2\sqrt{S}}{130}$$ for Single Engines.

In the above Rules, D = diameter of L.P. Cylinder in inches
S = Stroke in inches.
H = Heating surface in square feet.
P = Working pressure in lb per square inch

In vessels fitted with Diesel Engines :—

$$NHP=\frac{C\times N\times D^2}{\frac{S}{D}+50}$$

where NHP=the Nominal Horse Power.
N=the number of power cylinders.
D=the diameter of the power cylinders in inches.
S=the stroke of the piston in inches. In the case of the opposed piston type of Diesel engines S is half the combined stroke of the pistons.
C= 5 for Engines of the 4 S.C.S.A. type.
=10 for Engines of the 4 S.C.D.A. type.
= 9 for Engines of the 2 S.C.S.A. type.
=18 for Engines of the 2 S.C.D.A. type.
=16 for Engines of the 2 S.C.S.A. opposed piston type.

In vessels fitted with internal combustion engines other than Diesel type :—

$$NHP=\frac{BHP}{3{\cdot}5}$$, where BHP is the Brake Horse Power at full power.

Asterisk * (column 9) before an Owner's name indicates that he has obtained the Board of Trade Certificate of competency as Master.

SURVEYING PORTS (*see page* 95).

TABLE EXPLICATIVE CONCERNANT LE REGISTRE DES YACHTS.

MARQUES DE CLASSIFICATION, COLONNES 10, 11, & 12.

Toutes les abréviations, employées dans le Registre, ont leur définition dans la Table Alphabétique (*Voir* page 89.)

100A Cote des Yachts, en fer ou en acier, construits conformément, ou d'une façon équivalente, aux Règlements et aux Tables de la Société.

90A Cote des Yachts, en fer ou en acier, construits, sous certains rapports, plus légèrement que les Règlements de la Société ne l'indiquent pour la cote 100A.

A Non précédé d'un coefficient, est une cote pour les Yachts, en fer ou en acier, déjà construits et auxquels les Règlements de la Société ne s'appliquent pas.

A Première cote des Yachts, en bois ou composite. Le coefficient qui précède la cote, comme-ci : 18 A, 12 A indique le nombre d'années pour lesquelles le Yacht est actuellement coté. Le coefficient, placé entre parenthèses, comme-ci : (17) A, C (11), indique les périodes expirées pour lesquelles le navire avait été coté. Placé à la première ligne, le coefficient indique la période originelle, aux lignes suivantes les périodes de continuation ou de restauration.

A Sans terme d'années, indique que le Yacht, quoique n'étant pas construit conformément aux Règlements de la Société, est considéré comme méritant la cote assignée.

Lv Lv
A1* A1 Cotes assignées pour les navires, en fer, par l' "Underwriters' Register" actuellement fusionné avec le "Lloyd's Register."

R Cote des Yachts construits conformément aux Règlements de la jauge internationale tant comme échantillons que comme armement. Le coefficient qui précède la cote, comme-ci : 16 R, 14 R, dans le cas des Yachts en bois ou composite, indique le nombre d'années pour lesquelles les Yachts sont actuellement cotés.

1 Le chiffre 1, à la suite d'une cote, indique que le Yacht a un armement bon et suffisant. (*Voir* Tables de l'Armement des Règlements de la Société pour les Yachts.)

— Ce signe, à la suite des lettres A, A ou A indique que l'armement n'est pas conforme aux Règlements de la Société.

Pour les Yachts cotés R, il n'est pas fait usage du chiffre 1 pour l'armement qui doit, obligatoirement, être conforme aux Règlements de la jauge internationale avant que la cote puisse être assignée.

† Ce signe, précédant une cote, indique que le Yacht est aussi coté dans le "Registre du Lloyd" pour les navires marchands, et que ses échantillons répondent aux Règlements du "Lloyd's Register" pour cette dernière catégorie de navires.

Les chiffres, placés sous une cote, indiquent la date de la dernière visite passée par les Inspecteurs de la Société.

Quand le port et la date de visite figurent sans la cote du Yacht, cela indique que la cote est expirée ou qu'elle a été rayée, soit parce qu'une visite prescrite par les Règlements de la Société n'a pas été passée, soit parce que les honoraires n'ont pas été payés.

MARQUES DE CLASSIFICATION, COLONNES 10, 11, & 12—*suite.*

✠ Ce signe, précédant une cote, comme-ci : ✠100A1 indique que le Yacht a été construit sous surveillance spéciale.

✠ Ce signe, précédant une annotation de classification de Machines, comme-ci : ✠LMC ✠NE&B indique que les Machines, ou les Machines et les Chaudières, suivant l'annotation, ont été construites sous surveillance spéciale.

—— 3,27 Une ligne noire, avec date au-dessous, indique que la cote du Yacht a été retirée du Registre des Yachts de la Société, à la date indiquée, le Yacht ne pouvant conserver sa cote par suite de défectuosités signalées.

—— 3,27 Une ligne rouge, avec date au-dessous, indique que le cote du Yacht a été retirée du Registre des Yachts de la Société, à la date indiquée, le Yacht na pouvant conserver sa cote par suite de dérogations aux Règlements de la Société en ce qui concerne les visites.

... Ce signe indique que la cote du Yacht a été retirée du Registre des Yachts de la Société à la demande du propriétaire.

Quand les Colonnes 11 et 12 sont laissées en blanc, cela indique que le Yacht n'a jamais été coté dans le Registre des Yachts de la Société.

EXPLICATIONS DES ANNOTATIONS DANS LE REGISTRE DES YACHTS.

Jauge (colonne 4). La jauge de la Tamise représente approximativement la capacité intérieure d'un Yacht provenant d'un systéme de mesurage des Yachts adopté par le Royal Thames Yacht Club, en 1854. Ce tonnage figure dans le Registre pour chaque Yacht et est imprimée au-dessous des jauges officielles, quand ces jauges sont données. La règle, pour calculer la jauge de la Tamise, est la suivante :—Prendre la longueur sur le pont, depuis la face avant de l'étrave à la face arrière de l'étambot et en déduire la largeur, puis multiplier le résultat obtenu par la largeur et ce dernier résultat par la moitié de la largeur et diviser par quatre-vingt-quatorze.

Pour les Yachts ayant un acte de Nationalité, la jauge officielle, mesurée suivant la loi du pays auquel le Yacht appartient, figure en caractères comme ci-contre : 204·51 (Net) 546·65 (Brut)

Pour quelques Yachts ne battant pas pavillon britannique, la jauge qui figure a été mesurée conformément aux Règlements Britanniques et acceptée sous la Loi Britannique. Dans ce cas, la jauge figure en italique, comme ci-contre : *204·51* (Net) *546·65* (Brut)

Dimensions (colonne 5). Les dimensions qui sont imprimées sur la ligne supérieure, sont celles qui servent pour le calcul de la Jauge de la Tamise. Dans le cas des yachts qui sont cotés au Lloyd's Register, les dimensions sont celles qui figurent sur le Rapport de l'Inspecteur de la Société pour la première inscription de classification ; pour les yachts qui ne sont pas cotés à la Société, mais qui possédent un Acte de Nationalité, les dimensions sont prises sur le certificat d'enregistrement du navire. Dans les autres cas, les dimensions sont celles qui sont données sur les états reçus des Propriétaires, des Constructeurs, &c.

La **longueur** qui figure sur la ligne supérieure est mesurée, sur le pont supérieur, depuis la face avant de l'étrave à la face arrière de l'étambot, sauf pour les yachts non cotés, qui sont enregistrés officiellement comme navires anglais, et, dans ce cas, c'est la longueur enregistrée qui est indiquée.

La longueur indiquée sur la seconde ligne est la longueur hors tout.

EXPLICATIONS DES ANNOTATIONS DANS LE REGISTRE DES YACHTS—*suite.*

La longueur donné sur la troisième ligne est la longueur à la ligne de flottaison.

La **largeur** qui est indiquée est l'extrême largeur.

Le **creux** est mesuré, au milieu du navire, depuis le dessus des varangues jusqu'au dessus des barrots du pont supérieur.

La **hauteur** sous barrots est la hauteur maxima entre le haut des varangues ou du parquet de la cabine jusqu'à la partie basse des barrots du pont supérieur ou du rouf **par le travers de l'amménagement du propriétaire (salon).**

Le **tirant d'eau** est le tirant d'eau maximum jusqu'au bas de la quille.

Date de Construction (colonne 7). La date de construction, qui figure dans le Registre pour les Yachts construits avant 1903 sous la surveillance spéciale des inspecteurs de la Société, est celle du lancement. Pour les Yachts, construits depuis 1903 jusqu'à 1924 inclusivement, c'est celle de la dernière visite d'inspection en vue de la classification, quand la dite visite était passée dans les six mois qui suivaient la date du lancement. Si l'inspection, en vue de la classification n'a pas été terminée durant la période stipulée, la date de construction est celle qui prend cours six mois après le lancement. Pour les yachts construits postérieurement à 1924, la date d'achèvement de l'inspection spéciale est prise comme date de construction.

La date de construction des machines et des chaudières ne figure que lorsqu'elle diffère de celle de la construction du Yacht, et dans ce cas elle est donnée dans la colonne 8.

Yachts Automobiles (colonne 8) :—

"**Alcohol Motor**" indique une machine à combustion interne, utilisant l'alcool comme combustible.

"**Gas Engine**" indique une machine à combustion interne, utilisant le gaz comme combustible.

"**Oil Engine**" indique une machine à combustion interne, utilisant des huiles lourdes comme combustible, telles que Astatki, Mazout, etc.

"**Paraffin Motor**" indique une machine à combustion interne, utilisant comme combustible des huiles raffinées ayant un point d'inflammation supérieur à 23° C., telles que pétrole, kerosene, huile solaire, etc., etc.

"**Petrol Motor**" indique une machine à combustion interne, utilisant des huiles extrêmement volatiles comme combustible, telles que Benzoline, Gazoline, Essence, etc.

Force en Chevaux nominaux (colonne 8) :—

1°. Pour les Yachts pourvus de machines alternatives à vapeur, si les pressions et les surfaces de chauffe sont connues :—

$$\text{NHP}=\frac{\text{P}+340}{1000}\left(\frac{\text{D}^2\sqrt{\text{S}}}{100}+\frac{\text{H}}{15}\right)$$ pressions au-dessous de 160 livres.

$$\text{NHP}=\frac{\text{P}+590}{1500}\left(\frac{\text{D}^2\sqrt{\text{S}}}{100}+\frac{\text{H}}{15}\right)$$ pressions de 160 livres et au-dessus.

Pour déterminer la force en chevaux nominaux des turbines à vapeur, $\frac{\text{SHP}}{6}$ est à substituer, dans la formule ci-dessus, à $\frac{\text{D}^2\sqrt{\text{S}}}{100}$. où SHP est la force totale en chevaux sur l'arbre.

Pour les chaudières à tirage forcé on devra substituer dans les formules ci-dessus, $\frac{\text{H}}{12}$ à $\frac{\text{H}}{15}$.

2°. Si les pressions et les surfaces de chauffe ne sont pas connues :—

$$\text{NHP}=\frac{\text{D}^2\sqrt{\text{S}}}{100}$$ Machines à Triple et Quadruple expansion.

$$\text{NHP}=\frac{\text{D}^2\sqrt{\text{S}}}{120}$$ Machines Compound.

$$\text{NHP}=\frac{\text{D}^2\sqrt{\text{S}}}{130}$$ Machines Simples.

EXPLICATIONS DES ANNOTATIONS DANS LE REGISTRE DES YACHTS—*suite.*

Dans les formules ci-dessus

D = diamètre en pouces du Cylindre B.P.
S = Course du piston en pouces.
H = Surface de Chauffe en pieds carrés.
P = Pression de travail en livres par pouce carré.

Pour les navires pourvus de moteurs Diesel :—

$$NHP = \frac{C \times N \times D^2}{\frac{S}{D} + 50}$$

où NHP = Puissance en chevaux nominaux.
N = Nombre de cylindres.
D = Diamètre des cylindres en centimètres.
S = Course de piston en centimètres ; dans le cas de moteurs Diesel du type à pistons opposés, S est la moitié de la course combinée des pistons.

C = 0,775 pour les moteurs à 4 temps simple effet.
= 1,55 pour les moteurs à 4 temps double effet.
= 1,395 pour les moteurs à 2 temps simple effet.
= 2,79 pour les moteurs à 2 temps double effet.
= 2,48 pour les moteurs à 2 temps simple effet, à pistons opposés.

Pour les navires pourvus de machines à combustion interne, autres que des moteurs Diesel :—

$NHP = \frac{BHP}{3{\cdot}5}$ formule dans laquelle BHP représente la puissance en chevaux effectifs à la puissance maxima.

* Un astérisque (colonne 9) devant le nom d'un propriétaire indique qu'il a obtenu du "Board of Trade" un certificat de capacité comme capitaine.

INDEX TO DISTINGUISHING FLAGS.

INDEX TO DISTINGUISHING FLAGS.

INDEX SERVANT À DISTINGUER LES YACHTS PAR LEUR PAVILLON.

With a view to facilitate reference at sea, the Distinguishing Flags of Yachts have been arranged according to colours :—
1st, Red ; 2nd, Yellow ; 3rd, Dark Blue ; 4th, Green ; 5th, Light Blue ; 6th, Purple ; 7th, Chocolate ; 8th, Black.
Combinations of two or more colours generally follow the principal colour in the order above.
In Flags with vertical designs the colour next the mast is the principal colour ; in horizontal designs, the top colour.

The "PAGET"
RACE STARTING WATCH

PRICE £5 : 10 : 0

This watch is very popular with Yachtsmen. The dial, which is registered, shows at a glance precisely the minutes and seconds yet to elapse before the second gun, so that the yachtsman knows exactly how many seconds there are to elapse before getting into line.

This is an advantage over the ordinary stop watch, as the second's hand travels from 60 down to 1, and the minute hand travels from 5 to 1.

FROM £5 : 0 : 0

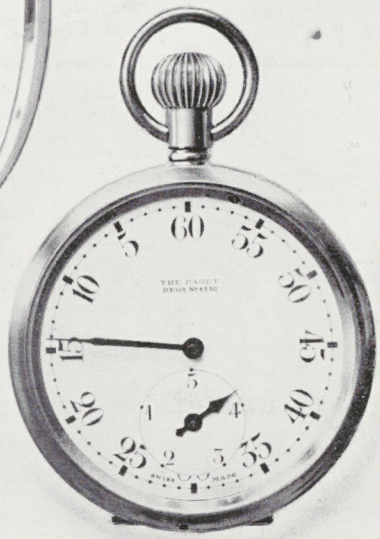
a Speciality

A large selection always
in stock



PRICE £2 : 10 : 0

As our firm has had so many enquiries from Yachtsmen and Motor-boatmen for a smaller "Paget," we have produced a baby "Paget" watch, which is slightly larger than a gentleman's ordinary pocket watch.

Money returned if either of these watches are not approved within seven days.

These Watches make very suitable Prizes for Competitions.

To anyone who is contemplating the ordering of a new yacht we suggest for consideration:—

1. That as the amount of money involved is, of necessity large, everything possible ought to be done to "buy the yacht" (which is what it amounts to) in the most favourable market;
2. That in order to "seek out" that market it is imperative to invite competitive tenders from half-a-dozen (or more) Shipbuilding Firms in different parts of the country;
3. That genuinely competitive tenders cannot be procured except on the basis of plans and definitive specifications prepared by a qualified and experienced Naval Architect.

We have designed over 500 Yachts, including:—

Aux. Sch., 650 tons (presently building by Denny, Dumbarton); "ELK," 300 tons, Aux. Sch. (Scott's, Greenock); "CHELSEA," 300 tons, Diesel Yt. (Ailsa Co., Troon); "RESTLESS," 730 tons, Oil Fuel S.Y. (Brown, Clydebank); "THALASSA," 700 tons, Oil Fuel S.Y. (Brown, Clydebank); "SAPPHIRE," 1421 tons, Oil Fuel S.Y. (Brown, Clydebank); "LIBERTY," 1571 tons, Stm. Yt. (Ramage & Ferguson, Leith).

To secure a sense of safety and independence when evening is approaching you need a "NIFE" battery or a "NIFE" Hand Lamp on board.

Nickel steel alkaline batteries are the only ones worth considering, for they have no acid fumes and can stand idle without injury; but when buying ask for "NIFE" British made—cheapest and best.
